PLT ACTIVITY GUIDE
PLT’s Activity Guide uses the forest as a “window on the world” to increase students’ understanding of our complex environment, to stimulate critical and creative thinking, to develop the ability to make informed decisions on environmental issues, and to instill in students the confidence and commitment to take responsible action on behalf of the environment.

PROJECT WILD ACTIVITY GUIDE
The Project WILD Activity guide offers curriculum based on wilderness and wildlife ecological perspectives geared towards preK-12 educators, non-formal educators, and parents. The goal of Project WILD is to provide wildlife-based conservation and environmental education that fosters responsible actions toward wildlife and related natural resources.

PROJECT WET ACTIVITY GUIDE
The Project WET Activity Guide offers curriculum that facilitates and promotes awareness, appreciation, knowledge and stewardship of water resources through hands-on, investigative, easy-to-use activities for kindergarten through high school classrooms.

Workshops highlight hands-on activities from the Project WET Activity Guide geared towards K-12 educators. A range of activities which link to the Utah State Core Curriculum for Science, Math, Language Arts, Social Studies, Reading, Art, and Music will be demonstrated. Participants will also receive information and resources pertaining to Utah’s local environments.

ENVIRONMENTAL EXPERIENCES FOR EARLY CHILDHOOD ACTIVITY GUIDE
Project Learning Tree’s Environmental Experiences for Early Childhood facilitates the exploration of nature with five senses, while meeting neighborhood trees and experiencing trees through the seasons. Developed with preschool educators and early childhood specialists, Environmental Experiences for Early Childhood includes over 130 experiences that engage children in outdoor play and exploration and is specifically designed for educators who work with children ages three to six. An accompanying music CD features songs from children’s musician Billy B. Brennan that encourages children to sing, dance, and move.

GROWING UP WILD ACTIVITY GUIDE
Growing UP WILD Activity Guide is designed especially for early childhood educators of children ages 3-7 and features 27 field-tested, hands-on, and nature based activities. The guide also includes outdoor exploration, scientific inquiry, art projects, music and movement, conservation activities, and reading and math connections. Growing UP WILD is an early childhood education program that builds on children’s sense of wonder about nature and invites them to explore wildlife and the world around them.
